First aid procedures
Eye contact Hold eyelids apart and flush eyes with plenty of water for at least 15 minutes. Get medical attention if irritation develops or persists.
Skin contact Wash the skin immediately with soap and water. Get medical attention if irritation develops or persists.
Inhalation Remove to fresh air. If the affected person is not breathing, apply artificial respiration. If breathing is difficult, give oxygen. Call a physician if symptoms develop or persist.
Ingestion Never give anything by mouth to an unconscious person. If swallowed, do NOT induce vomiting.
Give several glasses of water to dilute contents of stomach and call a physician.
General advice If you feel unwell, seek medical advice (show the label where possible). Show this safety data sheet to the doctor in attendance. Where there is a potential for eye exposure to this substance, an eye wash fountain should be provided within the immediate work area for emergency use.

with water.
Other information Clean up in accordance with all applicable regulations.

SECTION 7. HANDLING AND STORAGE

Handling Provide appropriate exhaust ventilation at machinery and at places where dust can be
generated.
Keep formation of airborne dusts to a minimum. When using, do not eat, drink or smoke. Wash
hands thoroughly after handling.
Storage Room temperature - normal conditions. Use care in handling/storage. Store in closed original
container in a dry place. Keep in properly labelled containers.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Occupational exposure limits

Engineering controls Use process enclosures, local exhaust ventilation, or other engineering controls
to control airborne
levels below recommended exposure limits.
Personal protective equipment
Eye / face protection Safety glasses with side-shields.
Skin protection Normal work clothing (long sleeved shirts and long pants) is recommended.
Respiratory protection Use a particulate filter respirator for particulate concentrations exceeding the
Occupational
Exposure Limit. A respiratory protection program that meets OSHA's 29 CFR 1910.134 and ANSI
Z88.2 requirements must be followed whenever work place conditions warrant a respirator's use. If
airborne concentrations are above the applicable exposure limits, use NIOSH approved respiratory
protection. MSHA/NIOSH respirators approved for dusts TC-21C or NIOSH approved cartridges for
Non-oil aerosols, N95, N99, N100 (42 CFR 84). If engineering controls do not maintain airborne
concentrations below recommended exposure limits (where applicable) or to an acceptable level
(in countries where exposure limits have not been established), an approved respirator must be
worn.
General hygiene
considerations
Use personal protective equipment as required. Handle in accordance with good industrial hygiene
and safety practice.
